

THE OUTCROP.

Devoted to the Mining and Development of the Windermere and Golden Divisions of the District of North East Kootenay.

Book VI., Chapter 7.

Wilmer, B. C., Thursday, July 13, 1905.

\$2.00 Per Year.

DISTRICT CROPPINGS

And Other Items of Interest in a General Way

"Fruit tree growing in the valley is only in the experimental stage yet, but so far I consider the prospects are most encouraging. We cannot expect that there will be no failures, for they have occurred in every good fruit country. I consider it a mistake at present for everyone to plant very large orchards and think it better to continue to experiment with the various hardy varieties until it is ascertained beyond doubt which ones are best adapted to this soil and climate." Remarkable Mr. Pitts of Windermere, and as he has been successful in growing several varieties of fruit already his sentiments are worthy of consideration.

Wilmer is becoming quite a cow town. One day last week no less than four good milk cows were added to the city herd. All these little things help to make up a home-town and in a new mining camp there is nothing that indicates permanency so well as to see the residents gathering these comforts around them. Moreover, there are few mining camps so favorably situated as the towns are in the Upper Columbia Valley. Here, while the miner delves away up among the snow-capped peaks his wife and family are happy in the valley in comfortable homes, surrounded by a fine garden, with fruit and vegetables growing luxuriantly, and a plenty of good milk to be had. What more can the miner ask? What more can anyone ask?

The wanton destruction of game out of season is a subject that will be much discussed for the next six weeks in this valley. An effort should be made to enforce the law, which is severe, and it can best be done by private individuals. When a police officer is around the law is obeyed and no opportunity is given him to act.

Speaking of the 16,000 trees he planted this spring R. A. Kington said the other day they were doing much better than he anticipated. He said that Mr. Sharpe when at Windermere examined them carefully and stated that there was a larger per centage of the grafts growing than they had at the Experimental Farm at Agassiz.

G. A. Starke's garden is attracting the attention of all who pass by. It is well and attractively laid out in Wilmer and his fruit trees, berry bushes, and every variety of vegetable show a wonderful growth.

Gus Anderson returned to Wilmer on Saturday after a year's absence on the Coast. He says that the news of the railway construction reached the Coast and he thought it time to return home.

The Columbia River Lumber Company's new store and warehouse at Atholmer is now well under way and will be quite an addition to that enterprising town.

A. B. McClellan, manager of the Imperial Bank at Golden, accompanied Manager B. R. Bruce to the Paradise mine Tuesday morning.

Capt. Munn's new dwelling is being built rapidly, a full force of carpenters being employed under the foremanship of H. Hale.

It is safe to bet that dirt will be flying on the Kootenay Central construction before this month closes.

The weather for the past week has been quite hot.

Miss Hayward of Galena and Miss McNeil of Sinclair visited Wilmer friends last Thursday.

Miss Young's organ will be raffled at the Atholmer Hotel on Saturday evening, July 16th.

Mrs. R. A. Power went to Golden on Monday's boat to meet her sister, who is coming to visit her at Wilmer.

The Cranbrook Herald has reached this office regularly for three weeks. It is evident the advice given was taken kindly—thanks.

Mr. and Mrs. W. Taggart and family came over from their ranch near Windermere on Sunday and spent the day with Wilmer friends.

The wagon road between Wilmer and No. 2 creek needs some repairs. A man handy with a shovel could do a lot of good along it in a few hours.

It will not be surprising if the population of the Upper Columbia Valley is increased 100 per cent within the next 90 days—the K.C.R. will do it.

F. Hall has one of the finest crops of raspberries in his Wilmer garden seen in the valley. The berries are just ripening and are fine, large berries.

Every subscriber of The Outcrop who pays a year in advance can have the Family Herald and Weekly Star of Montreal free until Jan. 1st, 1906, for the asking. This offer is a snap.

The steamer Ptarmigan brought down the lake another big raft of railway ties Monday to the mouth of the Columbia river, which delayed her leaving on her regular down trip until the afternoon.

Mrs. Hunter left Wilmer on Monday's Ptarmigan for Oida, Atholmer, to join her husband, who is ranching near there. While here Mrs. Hunter took much interest in church and social affairs, being an excellent musician. Her numerous friends regret her departure.

On Thursday, June 29th, Mr. Hardwick Grainger and Miss Bowen were married at Cranbrook, but they did not let it be known publicly until last Monday, when it proved a surprise to even the most intimate friends of the happy couple. Mrs. Grainger arrived at Windermere some months ago from Ontario and has many friends there. Mr. Grainger has lived in the valley most of his life, his home being at Thunder Hill. He is well known from Cranbrook to Golden as he has been driving the stages over this route for a long time, but will quit that work after the present trip. The Outcrop joins the many friends in wishing Mr. and Mrs. Grainger a happy and useful life.

Wilmer Mining Records.

CERTIFICATE OF IMPROVEMENT.

July 4—Silver Queen, on Findlay creek, by Wm. J. Walsh, for year ending July 12, 1905.

July 8—Heigh Grade, on Toby creek, by Chas. Munroe, 2 years, July 30, 1906.

July 8—Copper Capper and Deadwood, on Toby creek, by Chas. Munroe, Sep. 8, 1905.

July 8—Iron Mask and Silver King, on McDonald creek, by Thomas Starbird, July 24.

July 8—T. H. and Blue Bird, on Iron Cap creek, by Thos. Starbird, Aug. 3.

July 8—Crown Point, on Red Line creek, by Thos. Starbird, July 19.

July 8—Pudding and Farinham, on Red Line creek, by T. Starbird, July 30.

July 10—Queen Esther No. 1 and No. 2, by M. P. Michelson, July 16.

Washington, Deserter, Outcrop, and Outlet, on N. F. Toby creek, by M. P. McDonald.

Postpone Ry. Contracts

To Wednesday, July 19th—Contractors Ready to Start Work

It is now learned from the contractors, who were on the ground figuring on the first six miles of grading to be done on the Kootenay Central Railway, that the letting of the contracts that were to have been awarded two weeks ago, were postponed to July 19th, although the reason for this is not made known. It is known that at least three big contracting firms have had their representatives on the ground and have put in tenders. Messrs. Poupore & McVeigh have two car loads of their outfit at Revelstoke and are holding them there in the hope of being awarded the work, and to be ready to start work immediately.

Not a little discussion is heard on the statement so persistently indulged in by President Pollen of the K. C. R. Co. that "the C. P. R. will have nothing to do with the work." It is mostly considered that this is "political talk" and that an effort will be made to get a subsidy from the Provincial Legislature at the next session. However, it matters but little whatever the reason may be, for the two companies are working together to build the road and that is the all-important point to all concerned.

RIFLE MATCH

Windermere vs. Wilmer

The rifle match last Thursday afternoon, at the Wilmer range, between the Windermere and Wilmer teams was witnessed by quite a number of friends, among them being not a few ladies. The weather was fine and everything was favorable for big scores, but there were very few made. At times considerable interest was manifested, but there were few bets. This was the fourth match of the season, and Wilmer having won this by 52 points, they now have three matches to their credit. A most enjoyable feature of the afternoon was the cake and lemonade served by the ladies. Following are the scores:

G. O. Buchanan, lead bounty commissioner, places the amount paid for the year at about \$325,000. The amount of lead treated locally will be about 16,000 tons, at \$15 a ton bounty, earning \$240,000. The amount exported for treatment is about 11,000 tons, which is bountied to the extent of \$10 a ton.

Pleasure's Cradleless Round.—It is not that a game of cards for the love of the thing is wrong. It is not that going to the theatre is wrong in itself, if the play is a good one. It is not that any amusement in itself is wrong as a recreation; but it is the recurrence of these things over and over again, hour after hour, absorbing all the energy; recreation thus takes the place of real work, and time that was meant for educating the mind and spirit goes to mere amuse-

ment. That is really where the fault lies, and such a life produces a restlessness of spirit. That is what I find is the mischief more than any one definite sin. There is a kind of restlessness in society at this end of London.—The Bishop of London.

The annual report of the North Star Mining Company shows net profits of about \$23,000 from operation and this with \$17,000 Government bounty in lead ores extracted made a total of \$40,000. During the year two cash distributions were made to shareholders amounting to 10 cents per share. During the earlier part of the year small bodies of ore were probably extracted from the old workings, but about the end of February these deposits were exhausted and the mine closed. The directors decided to spend a limited amount in prospecting adjacent to the Kellogg shaft, but this work has not yet advanced sufficiently to show results.

The C. P. R. irrigation ditch surveyors have again been hurriedly taken off their work and left on the last steamer for Vancouver Island to survey a short line of railway. One of the party is credited with saying that the ditch west of Wilmer is to be put in.

W. H. Beatty returned from a trip to Cranbrook Sunday and has since gone up to the Delphine mine.

There is plenty of hope for the future of the big silver-lead deposits of British Columbia. Lead is yearly growing in value, its consumption being very heavy and widespread. At present there is a prohibitive duty on lead imported into the United States, but the Canadian market is rapidly developing, and the British Columbia industry will not always require a bonus to make it pay. The world's production of pig lead is annually about 880,000 tons, of which the United States produces 284,000 tons. About 55 per cent of the lead produced in the United States comes from the Court d'Alene district, its production being about 85,000 tons per annum. The silver-lead ores are about the only mining mediums that will stand transportation costs to those points which require them as the vehicle for carrying down the silver and gold values of the dry ores. There is a brisk demand in Europe for lead ores at present. The chief value lies in the fact of their being the vehicle-carrying medium to the lead residue

from the zinc smelters, and this should be the competitive factor for the Kootenay that will force the payment of better prices.—Vancouver World.

A True Friend

BY "LITTLE MAC."

Editor The Outcrop: Dear Mr. Evans,— "We live in a new and exceptional age. America is another name for Opportunity. Our whole history appears like a last effort of the Divine Providence in behalf of the human race".

The overwinding brain and brawn of the world pour into this great land of America. This human flood tide sweeps the nation forward. It not responds to the logic on natural conditions. The wealth of the nation benefits the unit that makes it—the individual.

The year of 1828 saw the construction by the Boston and Maine of the first 15 miles of railroad. 1902, a span of but 74 years, witnesses 201,000 miles of railroads constructed, showing total earnings and income of \$1,738,272,482.

What a revolution! What a story of success! Not, however, confined to railroading. The same marvelous industry is common to every branch of industry. The acme of progress has not been reached. We have to begin our onward march. What will progress tell us 74 years hence of millions and multi-millions created from men who had trained their brains to discriminate, investigate, and take advantage of opportunity.

Are we alive to the industrial revolution enacted round us and before our eyes? Inaction, incredulity in this epoch of the 20th century opportunity is a veritable crime against yourself. Our country teems with fortune possibilities for those who do. Let us immediately spring from logical reasons, not illogical assumptions.

"Our greatest glory consists in not never failing, but in rising every time we fall". Inaction, incredulity in this epoch of the 20th century opportunity is a veritable crime against yourself. Our country teems with fortune possibilities for those who do. Let us immediately spring from logical reasons, not illogical assumptions.

You are camped in one of the richest white metal camps on the American continent, and you have done the lions share in bringing it to the notice of the outside world. Stick right where you are and I will do everything that one man can possibly do for another to help you to "winout" financially and otherwise. I remain, Your true friend to the end, let come what will,

M. McDONALD.

Calgary, Alta., July 3, 1905.

P.S.—Send me 10 copies of your last issue. They are in demand everywhere.—M. McD.

Dg!

Success-nuggets do not lie scattered about the surface-salt of the business goldmine. Work—hard, relentless pick and shovel work—alone unearths life's greatest prize.

Just as the diamond lies hidden in the mountain cave—just as the pearls conceal in the ocean's bottom, so success lies dormant and beyond the reach of him who does not strive to secure it.

Opportunity, like precious jewels, are all about us. But only effort—steady, ceaseless, whole-souled effort—can dig them out and secure their value.

Quit scraping over the surface of your business chances; quit remaining content with the pay-dirt on the outer edges of your commercial prospects. There is a nugget in every opportunity—if you only delve deep enough to get it.

And don't merely dig without aim or method. Just as the miner assays his claim before he sinks his shaft, so should you probe each business possibility before you begin to work it.

First locate your claim—your main chance. Then prove it. Then plan your system to work it. Then take off your coat, and—DIG.—Commercial.

SOLVED LEAD PROBLEM

Heberlein Proved --Saves \$4 a Ton for Producer

Probably the most important news that has reached Kootenay for many a day is that the Heberlein process at Marysville smelter is a pronounced success. It has now been running several weeks, and has done all that was asked or expected of it. Just what this involves can hardly be gathered from its name at least that there is an actual saving of \$4 a ton in the treatment of silver-lead ores of a certain grade, that the other lead smelters in the Kootenay will have to adopt the process, and that the producer should benefit to the extent of \$4 a ton on a 60 per cent lead ore concentrate. We imagine this will do more than tax or tariff legislation to stifle the complaints of lead ore miners, and by solving the problem of cheap treatment it should stimulate production to an extent hitherto unknown in the Slokan. Just how this economic problem has been solved may be gathered from the fact that the Heberlein process is a direct as compared with an indirect one. It does not produce matte as in the ordinary process, which then has to be treated again, but its first product is bullion, which only needs refining. In the process of roasting all impurities are eliminated, the ore being first crushed, in the roaster it is rendered viscous and the sulphur passes off so that by the time the ore reaches the lead stack and the blast is applied nothing remains but to consolidate it into metal. The doing away with the intermediate process of treating matte effects the saving already specified. The most careful assays of the slag at Marysville show that all the silver values have been recovered in the furnace, the slag contained practically nothing. Another lead stack to treat customs ore has been started. It is understood that the management of both Trail and Hall Mines smelters have been watching the development of the Heberlein process for a long time. They realized that if it proved a success at Marysville they would have to adopt it, and only waited for proof of its efficiency before doing so. The cost of installation at the local smelter would be between \$80,000 and \$100,000, a considerable sum, and one which the management would not have been justified in asking for until the absolute success of the process had been demonstrated. Now that this has been achieved we hope to hear before many months have passed that all the lead smelters in British Columbia have followed suit, and that the lead mining industry has taken on a new lease of life. Incidentally this will be effective in turning the scale in favor of local as against European treatment.—Nelson Tribune.

A Vancouver despatch to the Cranbrook Herald says C. Hungerford Pollen of the Kootenay Central Railway has returned from Montreal, and says all the necessary preliminaries have now been completed for the construction of the line from Cranbrook to Golden. Contracts for grading will be let this month. Work will commence on the Golden end. Mr. Pollen states that the road will be built by the Kootenay Central Company and that the Canadian Pacific will have nothing to do with the work. However, since the road begins on the main line of the Canadian Pacific and will end on the Coast Next branch of the company, it is evident that satisfactory traffic arrangements were made with Sir Thomas Shaughnessy when Mr. Pollen was at Montreal.

C. E. WELLS, E. J. COYLE,
Agent, Agent,
Golden, B.C. Vancouver**HOW PA RESTS**

When pa comes home at night, ma says,
"Now children you must quiet be;
Poor pa is tired 'most to death,
And I'll be quick and get his tea."

Then pa comes in and claps his hands,
And says, "Hoorahs for little Tim!"
And right away us children know
That we shall have some fun with him.

The baby in her high chair crows,
And stretches out her arms to him;
And soon he takes her on one knee,
And on the other dandles Jim.

And Juliet and Kate and me—
We hang upon his rocking-chair,
And every breath we talk to him,
And pat his face, and smooth his hair.

And ma she gets the supper on,
And says, "Do children let him be!
Poor pa don't get a minute's rest;
Now let him come and have his tea."

And then we hold him fast and tight,
Until he pulls and breaks away,
And then we chase him round the room;
Pa is the greatest one for play!

And then ma smiles, and says, "Dear me!
You're wicker than the children, Ned!
Now quiet down, and come and eat,
And then I'll put them straight to bed."

And ma she means it, truly true—
But pa, he looks at Kate and me,
And when he looks like that we know
There'll be a frolic after tea.

Tenderfeet Here

To all new countries the "tenderfoot" finds his way and it must not be expected that the Upper Columbia Valley will prove an exception to the rule. Indeed, already one or two of the most "tender" specimens have reached here and have gone away wiser than they came. And right here it may be well to state that there is no gold to be picked up along the road side, but that there are many opportunities for men with brains, some money, and used to hard work, to make fortunes.

There are many varieties of "tenderfeet" and some of them thrive in a new country, while others do not and others again have their noses pinched at once and leave forthwith.

It was some of the latter species that recently visited here. There were only two in the bunch, and, perhaps, as they learned quickly a vast amount of experience it may be well not to name them. Yet it may be of benefit to others of their kind to describe their awful experiences in the wild west.

The twins arrived in Golden from somewhere. They had heard that the Kootenay Central Railway was to be built through a marvellously rich valley and they thought for once they would be ahead of construction; yes, they would be the advance-guard of civilization—they would rough it. They would make their way into a new country, take up a big tract of land—160 acres—and then, yes, and then, they would watch the golden sunset as it sank behind the great white glaciers, and all the rest of it; yes, and then the railway would be built, and then they would sell their great estate for a fortune—go back home and live happy evermore. Oh, it was a beautiful dream for men with soft, white hands. They start.

On board the steamer Ptarmigan, oh, everything is comfortable and the scenery sublime. But, what does this mean? Why, it costs all of \$5 to ride 120 miles. Goodness, gracious, and 50 cents to eat, and that's the ruling rate at the hotel, well, well. That don't compare with the country we come from. They arrive. The land agent says land is worth \$1 an acre and upwards, and refuses to supply a guide and team free to show us over the country, for it would soon cost more than 160 acres are worth at \$1 an acre. There is plenty of good land to be had, but it would have to be fenced, a house and barn built and the land cleared and cultivated before it could be sold, just because other men have been doing it for years; yes, and every man works hard himself. That is too rough for us. Let us get out of such an awful rough country!

They depart.
Just what such men as these expect is hard to conceive, and it is even harder to imagine the price of land and living wherever they hail from. They found fault with everything and everybody

S.S. PTARMIGAN

Leaves Golden every Friday Morning at 4 O'clock arriving at Wilmer, Athalmer and Windermere the same evening. Returning the Ptarmigan leaves Wilmer every Monday at 6 a.m. reaching Golden that evening.

Freight and passengers conveyed to any point along the route.

Canadian Pacific Railway Company**Land
Department
for British Columbia.**

The Canadian Pacific Railway Company owns large areas of choice Agricultural Lands in the Kootenay and Boundary Districts of British Columbia, which are offered for sale at from \$1.00 to \$5.00 per acre, on easy terms of payment.

Timber leases can also be obtained on reasonable conditions.

For maps and further particulars apply to the following local land agents:—

V. HYDE BAKER, Cranbrook, H. & M. BIRD, Nelson
I. H. WILSON, Wardner, E. MALLANDAIN, J., Creston,
W. M. FROST, Gateway, Mon. J. A. McCALLUM, Grand Forks,
R. R. BRUCE, Wilmer.

or to J. S. DENNIS, B.C. Land Commissioner, C.P.R. Co., Calgary, Alberta.

Notice.

Parties cutting timber or wood on the lands of this Company without authority will be prosecuted.

WINDERMERE ITEMS

(From Our Own Correspondent.)

Mrs. Thos. Starchin of Blouby is visiting Mrs. J. C. Pitts.

Mrs. Kilpatrick and sister, Miss McKinnel, have returned to Golden.

Mr. and Mrs. J. A. Stoddard and Miss Evelyn left on Monday's boat for Golden.

Mr. and Mrs. Carlin and family returned to Golden Monday after spending a week in town.

J. Watson and brother were in town this week. It is understood that Mr. A. Watson leaves for his prairie home this week.

Miss Forty has placed the sum of \$5.25 to the piano fund. This being the proceeds from the dance, held recently, after paying expenses.

Mr. and Mrs. McCleneghan and family, Miss Hume and Mr. Byrnes drove over from Fairlands on Sunday to visit Windermere.

Another proof that the hardy plants will flourish in the valley may be seen at the residence of J. C. Pitts. An old fashioned double rose blooms on the south front of the house. Over 150 perfect roses have been counted at one time, while the bush contained hundreds of buds, filling the house and lawn with their fragrance.

The Golden Star is still shining from Missouri. Why not rubber around and boost Golden, the valley and the K. C. K. Each are worthy.

It is expected that the representatives of several mining capitalists will arrive here in the course of a few weeks to examine certain promising mineral claims. The Platinium is making a special trip this week and is expected to arrive this morning.

From the smoke it is evident some big bush fires are burning north of here.

R. S. Gallor of Canterbury went down to Golden on the Platinium Monday.

The Outcrop is on sale at A. R. Yates Drug Store, Wilmer.

THE HOTEL WILMER.

Is a new building and is furnished throughout with all modern improvements.

The bar is supplied with the choicest brands of Wines, Liquors and Cigars.

THE TOURIST or Tenderfoot who wanders into Wilmer should always camp at the Hotel Wilmer.

Within its doors can be found beds that soothe the weary to dreamless sleep, drinks that calm the troubled soul, and food that its epicure could pass without sampling. If you want anything more

Who got the tin medal?

Do the Hard Thing First.

A bank president was asked to what one thing more than all others could he attribute his success. He pointed to a small printed motto which read: Do the Hard Thing First. "I came across that motto years ago," he said, "at a pivotal point in my life. I had for some time been burdened by my position. That motto was a flashlight to my intelligence. I suddenly realized that I had been in the habit of putting off the disagreeable duties, of evading the unpleasant tasks, and they had formed a ghost which haunted me and held me back. I tackled up that motto and settled down to work on the disagreeable duties. I had pushed aside; soon I had them out of the way, and ever afterwards I attempted the hardest thing first. I gave my freest effort to the work. I dreaded most, and I saw what I called my success largely to this awakening and change of tactics."
